SUMMARY

Final-year B.Tech Information Technology student with hands-on experience and practical knowledge in full-stack web development, backend systems, and AI-integrated web application development. Proficient in Python, Flask, and MySQL with a keen interest in using AI to create intelligent applications. Demonstrated ability to lead cross-functional teams, deliver production-ready applications, and implement RESTful APIs — always seeking opportunities to contribute to innovative engineering environments. Continuously exploring and learning new technologies.

TECHNICAL SKILLS

Languages & Technologies: HTML, CSS, JavaScript, SQL, Python, Spring Boot(Basics)

Databases: MySQL

AI/ML: Machine Learning fundamentals, NVIDIA NIM (Neural Information Management) API integration, Adaptive Systems Development

Developer Tools: VS Code, IntelliJ IDEA, Git/GitHub, ngrok, Microsoft Office Suite

EDUCATION

Bachelor of Engineering – Information Technology Enrollment No.: EN23IT301024	Medicaps University, Rau, MP 2023 – Present
Senior Secondary (Class XII) – Science Percentage: 88%	C.K.C Academy, Jhansi, UP 2022 – 2023
Secondary (Class X) Percentage: 85%	C.K.C Academy, Jhansi, UP 2021 – 2022

PROJECTS

Code Escape Room LINK	2026
- Full-Stack AI-Integrated Web Application - Engineered a gamified web escape room built with Flask and MySQL, integrating NVIDIA NIM to adapt puzzle difficulty based on user performance. - Defined RESTful API endpoints; session management and secure token handling for multi-role user access - Leveraged user behaviour data to build data-driven adaptive systems to enhance user engagement	

Tech Stack: Python, Flask, MySQL, HTML/CSS/JS, NVIDIA NIM API, Git

Adaptive Learning Chatbot LINK	– Present
- AI-Powered Education Platform - Architected a Flask-based backend with a normalized MySQL database for agile syllabus and quiz management - Implemented adaptive quiz generation logic based on student performance and difficulty levels - Explored AI-based personalization strategies for improving learning outcomes	

Tech Stack: Python, Flask, MySQL, Railway, OpenAPI, ngrok, Git

RapidReport LINK	2024
- Anonymous Crime Reporting Web Application - Designed a secure crime reporting platform with Flask and MySQL enabling anonymous submissions - Replaced third-party form systems with a custom database-driven solution	

Tech Stack: Python, Flask, MySQL, HTML/CSS/JS, Git, Supabase

Portfolio Website | ar9av.netlify.app

- Developed a personal portfolio website to showcase projects and technical skills
- Focused on clean UI, responsive design, and performance optimization

Tech Stack: HTML, CSS, JavaScript, Netlify

INTERNSHIPS

Training Internship – IT Department, Western Railways 2024

- Gained practical exposure to enterprise IT Infrastructure, network systems, and software operations in a government railway environment

Internship at MoveInSync, Bangalore as a SDE Backend Developer June – August 2026

- Built and shipped a mandatory comments API on Tripsheet edit endpoints in the Mobile App Backend, improving change auditability.
- Developed a Bulk CSV/XLSX upload feature for an Internal Messaging Tool, including per-row validation and duplicate handling for large batches
- Conducted a security audit on an internal Spring Boot service, identifying and fixing a misconfigured authorization rule that had exposed Internal monitoring endpoints publicly

CERTIFICATIONS

Deloitte Australia Technology Job Simulation | Forage July 2025

- Completed a virtual job simulation involving software development tasks, coding exercises, and proposal writing for a business dashboard solution

TCS iON Career Edge – Young Professional | Virtual Certification July 2025

- Completed industry-oriented training covering professional communication, business ethics, workplace readiness skills

ACHIEVEMENTS & LEADERSHIP

- Runner-up, Best Nature Photography Competition – Medcaps University College Fest
- Active member of the University Tech Club; participated in internal meetups, coding jams, and collaborative logical reasoning sessions
- Participated in college hackathons including the Panchakarma Hackathon, contributing to rapid-prototype development under time-constrained conditions

ADDITIONAL INFORMATION

- Strong interest in applying AI to real-world applications and continuously learning emerging AI technologies
- Actively exploring AI tools, APIs, and frameworks to build automated and adaptive systems
- Driven about backend development, system design, and Solution-oriented approach.
